

Dear FCC,
Satellite Radio has breathed fresh air into radio listening. I was previously one of those people who ONLY listened to CDs because radio was so poorly produced. The constant chatter and poor programming of traditional radio was not for me. I have subscribed to XM radio for more than 2 years now and could not give it up. I could NEVER go back to traditional AM/FM boredom. It is not up to the NAB to decide what I can hear. The FCC needs to reject the petition of the NAB and send them a clear message that XM RADIO is programming that people WANT and NEED to have available.

Thanks for your attention,

Joel Buchanan
